Chapter 1

R Basics

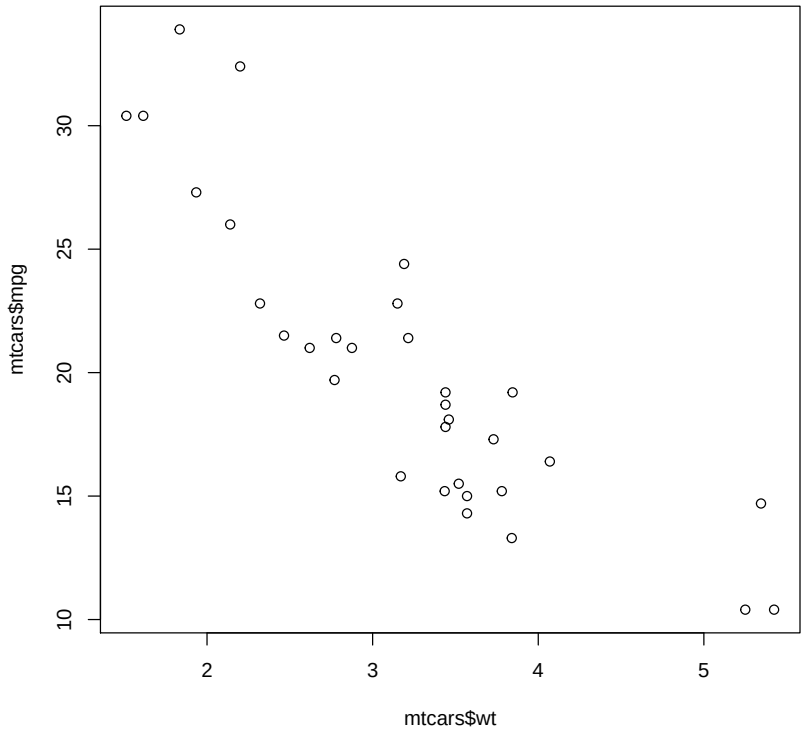
There's not really much to add for this chapter. Move on to the next one.

Chapter 2

Quickly Exploring Data

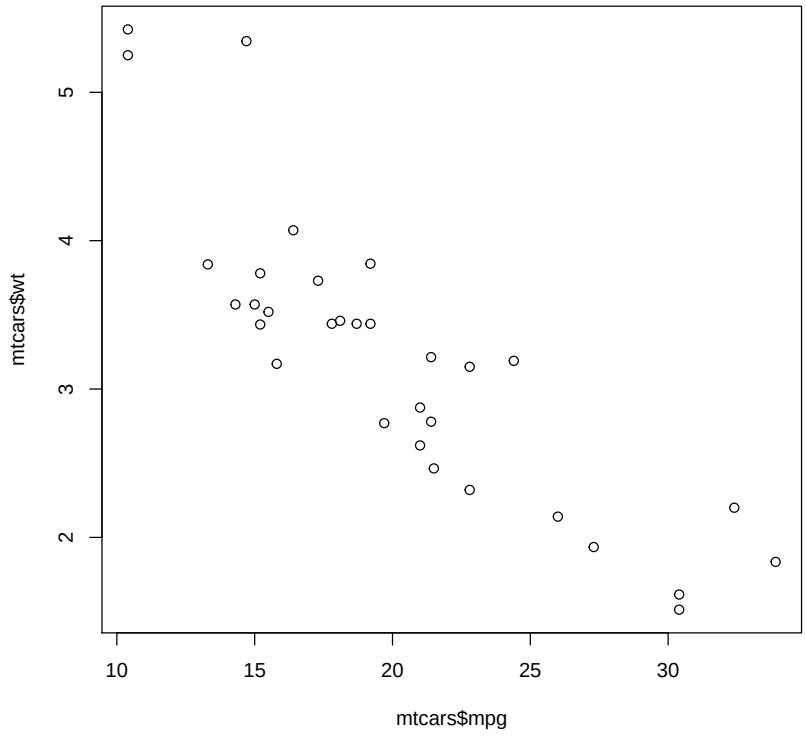
1. Produce the following plot with the `mtcars` dataset. It's built into R so you do not need to load any packages:

```
plot(mtcars$wt, mtcars$mpg)
```



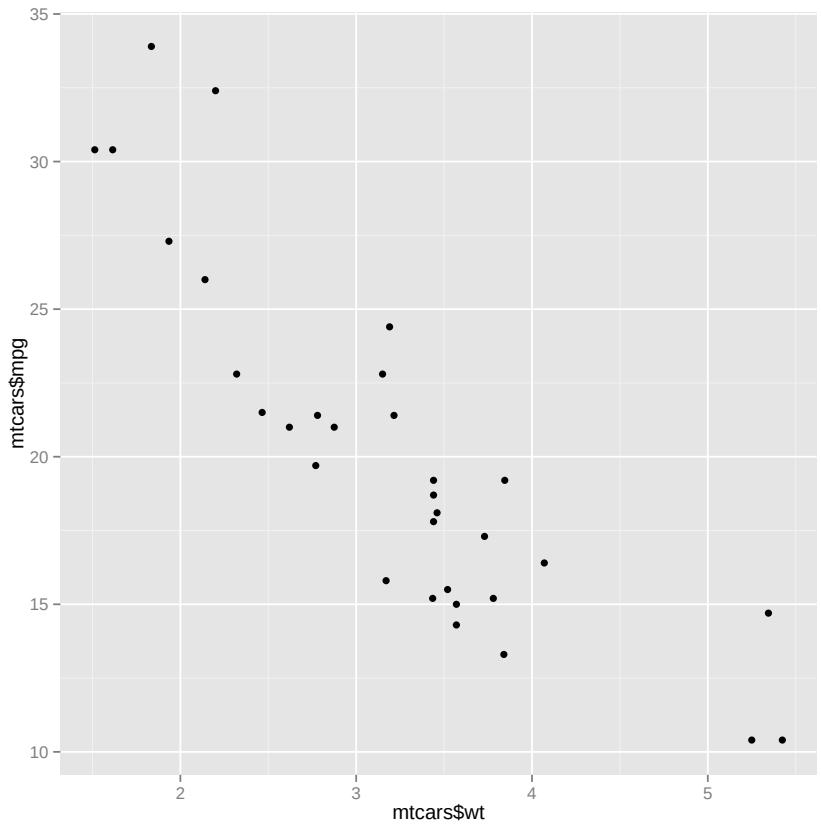
2. Produce the following plot with the `mtcars` dataset. It's built into R so you do not need to load any packages:

```
plot(mtcars$mpg, mtcars$wt)
```



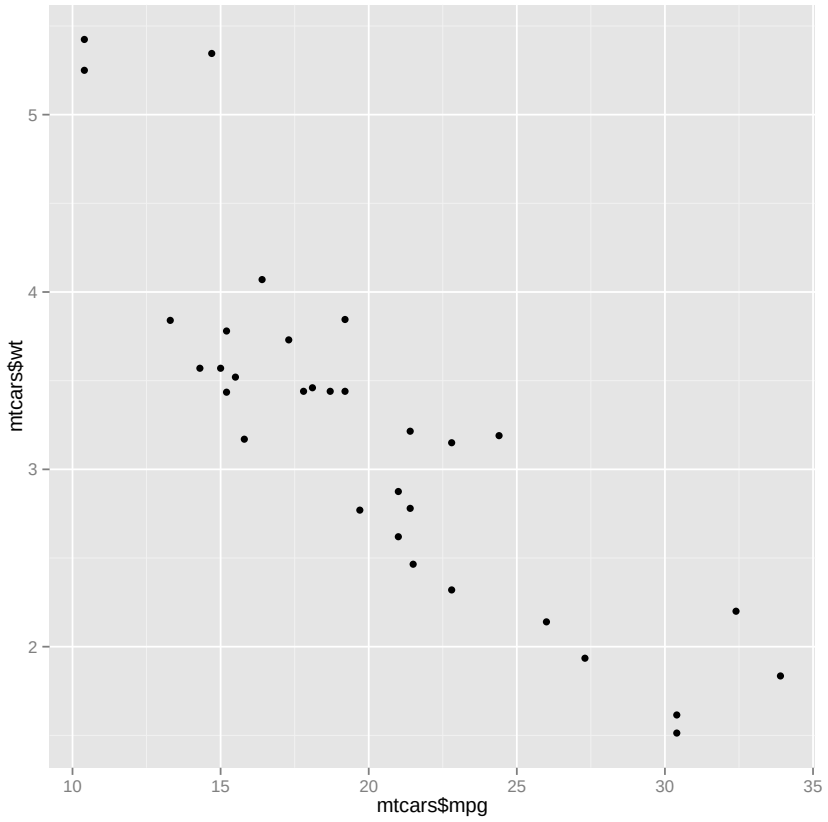
3. Load the ggplot2 package and produce the following plot with the mtcars dataset:

```
library(ggplot2)
qplot(mtcars$wt, mtcars$mpg)
```



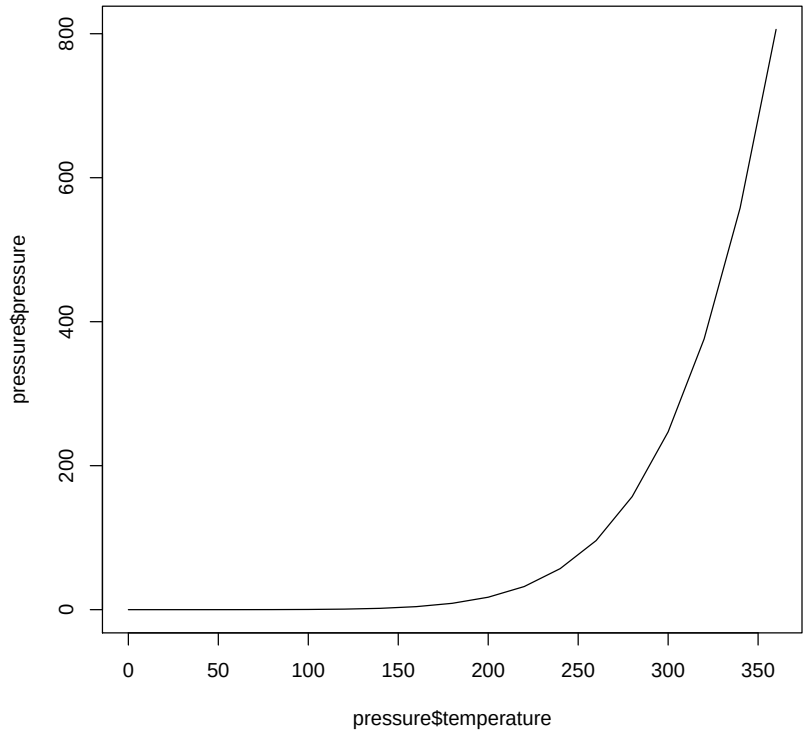
4. Load the ggplot2 package and produce the following plot with the mtcars dataset:

```
library(ggplot2)
qplot(mtcars$mpg, mtcars$wt)
```



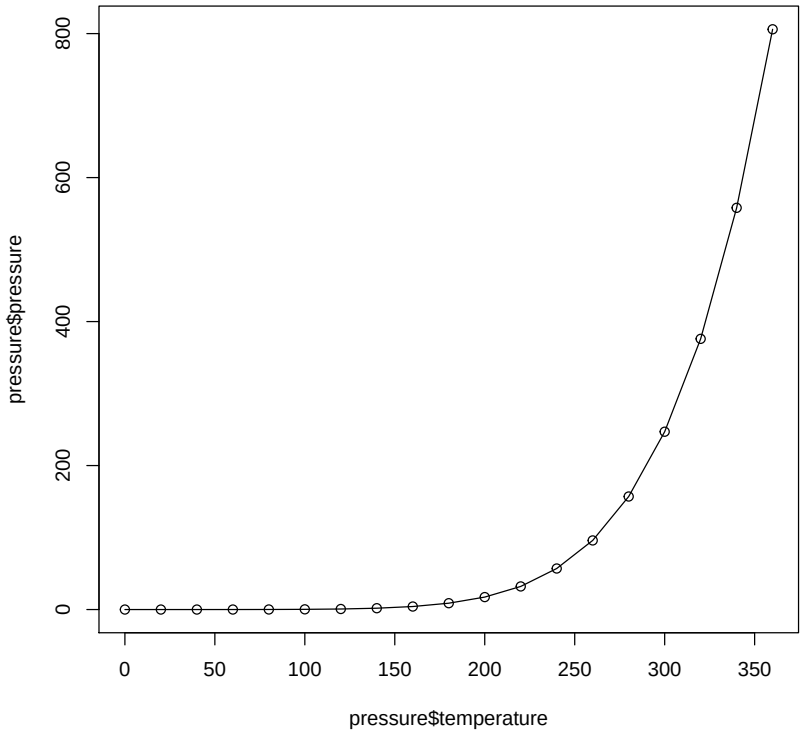
5. Produce the following plot with the pressure dataset. It's built into R so you do not need to load any packages:

```
plot(pressure$temperature, pressure$pressure, type = "l")
```



6. Produce the following plot with the pressure dataset. It's built into R so you do not need to load any packages:

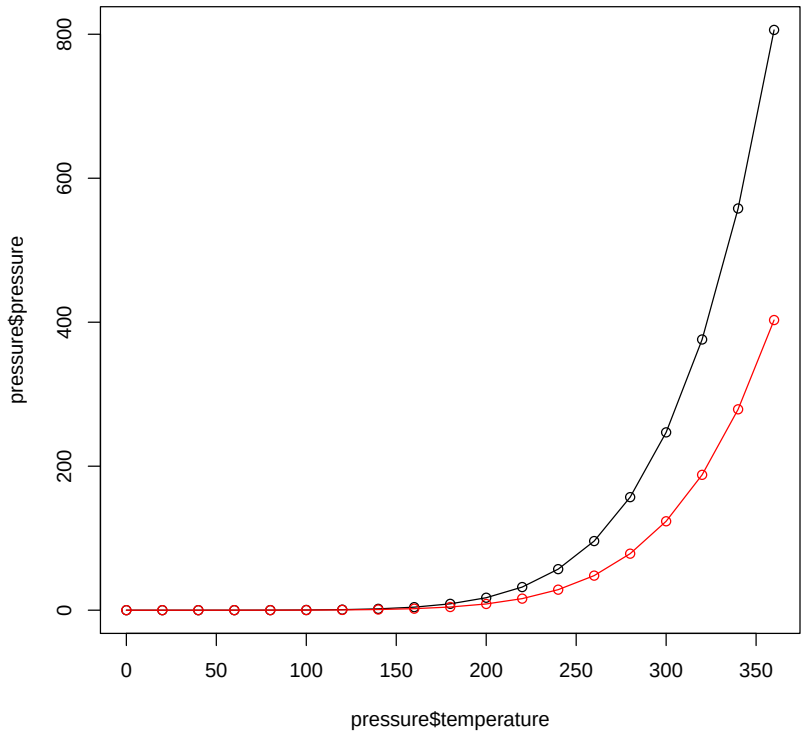
```
plot(pressure$temperature, pressure$pressure, type = "l")
points(pressure$temperature, pressure$pressure)
```



7. Produce the following plot with the pressure dataset. It's built into R so you do not need to load any packages:

```
plot(pressure$temperature, pressure$pressure, type = "l")
points(pressure$temperature, pressure$pressure)

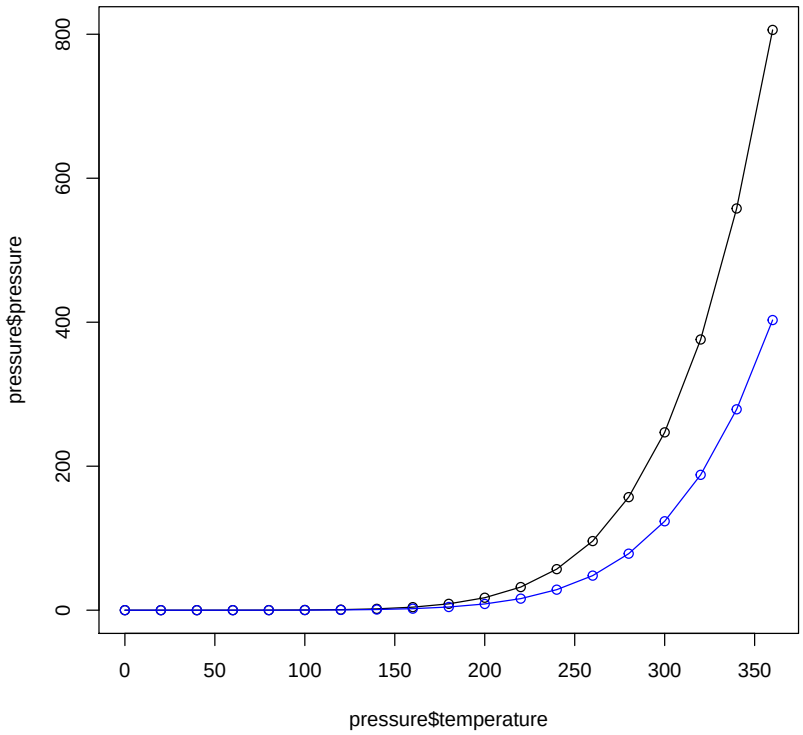
lines(pressure$temperature, pressure$pressure/2, col = "red")
points(pressure$temperature, pressure$pressure/2, col = "red")
```



8. Produce the following plot with the pressure dataset. It's built into R so you do not need to load any packages:

```
plot(pressure$temperature, pressure$pressure, type = "l")
points(pressure$temperature, pressure$pressure)

lines(pressure$temperature, pressure$pressure/2, col = "blue")
points(pressure$temperature, pressure$pressure/2, col = "blue")
```



9. Load the ggplot2 package and produce the following plot with the pressure dataset. It's built into R so you do not need to load any packages:

```
library(ggplot2)
qplot(pressure$temperature, pressure$pressure, geom = "line")
```
